Children with Health Needs who Cannot Attend School Policy

Document Owner	Trustees
Author	Vice Principal: Pastoral
Committee	Board of Trustees
Date established	2024
Frequency of Review	Annual
Date of Last Review	June 2024
Date approved by Trustees	June 2024
Date of next review	June 2025

1. Aims

This policy aims to ensure that:

- Suitable education is arranged for students on roll who cannot attend school due to health needs
- Students, staff and parents/carers understand what our school is responsible for when education is being provided by the local authority

2. Legislation and guidance

This policy is based on the following legislation:

- The Education Act 1996
- The Education (Pupil Registration) (England) Regulations 2006

It is also based on the following statutory guidance from the Department for Education (DfE):

- Alternative provision
- Arranging education for children who cannot attend school because of health needs

This policy also follows guidance provided by our local authority.

<https://www.gloucestershire.gov.uk/ghes/guidance-for-schools-and-professionals/>

This policy complies with our funding agreement and articles of association.

3. Responsibilities of the school

Where possible, the child's health needs should be managed by the home school so that they can continue to be educated there with support, and without the need for the intervention of the local authority.

3.1 If our school makes the arrangements

Initially, our school will attempt to make arrangements to deliver the same high standard of education for children with health needs who cannot attend school.

- Pastoral Year Leads and SENCo will be responsible for making and monitoring these arrangements
- Arrangements can include sending work home.
- Parents/carers and students will be consulted about these arrangements through regular scheduled meetings.
- Students will be reintegrate back into school, after an initial meeting, with an agreed phased return.

3.2 If the local authority makes the arrangements

If our school cannot make suitable arrangements, or if it is clear that a child will be away from school for 15 days (consecutive or over the course of the year) or more because of their health needs. It is the responsibility of the Local Authority (where the child resides) to arrange suitable education.

When the local authority arranges alternative education, the education should begin as soon as possible, and at the latest by the 6th day of the child's absence from school.

Where full-time education is not in the child's best interest for reasons relating to their physical or mental health, the local authority must arrange part-time education on whatever basis it considers to be in the child's best interests.

- Referrals to the Hospital Education Service can only be made by an NHS consultant, community paediatrician or a registered clinician of a child in treatment with CAMHS (Child and Adolescent Mental Health Services). They must be able to confirm that due to the child's current medical condition they are too unwell to attend their main school, and they also must be able to confirm they will be overseeing their treatment for the duration they are with Hospital Education Service for the primary reason for the referral.
- Once a medical referral has been received, further information is requested from schools to support the application. There may also be a request for additional SEND, Social Care or Advisory Teaching Service/Educational Psychologist input if relevant.
- All evidence is carefully considered by the admissions panel before making a decision.

In cases where the local authority makes the arrangements, our school will:

- Provide to the local authority, at agreed intervals, the full name and address of any students of compulsory school age who are not attending school regularly due to their health needs
- Work constructively with the local authority, providers, relevant agencies and parents/carers to ensure the best outcomes for the child
- Collaborate with the local authority to ensure continuity of provision and consistency of curriculum, including making information available about the curriculum
- Along with the local authority, regularly review the provision offered to ensure it continues to be appropriate for the child and that it is providing suitable education
- Share information with the local authority and relevant health services as required
- When a child has complex or long-term health issues, work with the local authority, parents/carers and the relevant health services to decide how best to meet the child's needs (e.g. through individual support, arranging alternative provision or by them remaining at school, being supported at home and back into school after each absence)
- Where possible, allow the child to take examinations at the same time as their peers, and work with the local authority to support this
- Help make sure that the child can be reintegrated back into school successfully
- When reintegration is anticipated, work with the local authority to:
 - Plan for consistent provision during and after the period of education outside the school, allowing the child to access the same curriculum and materials that they would have used in school as far as possible, including through digital resources
 - Enable the child to stay in touch with school life (e.g. through newsletters, emails, digital learning platforms, social media platforms, invitations to school events or internet links to lessons from their school), and, where appropriate, through educational visits

- Create individually tailored reintegration plans for each child returning to school, which includes extra support to fill any gaps arising from the absence
- Consider whether any reasonable adjustments need to be made

4. Monitoring arrangements

This policy will be reviewed annually. At every review, it will be approved by the full board of trustees.
